Subject: CTMS Start-up and Amendment Fees

In order to provide service to our growing clinical research community, a CTMS start-up fee will be added to all externally-funded studies with new budgets executed on or after September 1, 2018. These fees are not accounted for in the University's indirect cost base as they are directly related to a per protocol licensing fee agreement with our CTMS vendor. Additionally, as Protocol Amendments are issued that impact the CTMS configuration, a CTMS amendment fee is also required.

Sincerely,

Brian J. Sevier, Ph.D.
Director
UF Office of Clinical Research
