

Description: OnCore uses many pop-up (browse) windows that allow you to make selections and enter data. If your browser is set to prevent pop-up windows from opening, it will also prevent OnCore's browse windows from opening. You must **allow (unblock)** pop-up windows to open in each browser that you are using with OnCore.

USE A SUPPORTED BROWSER

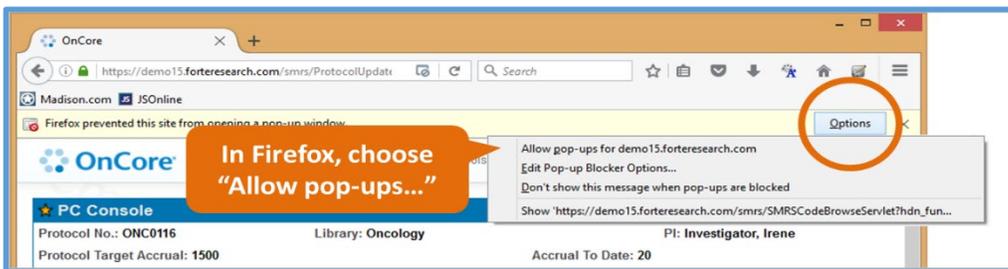

- Chrome
- Firefox
- Internet Explorer 11
- Safari

DISABLE POP-UP BLOCKERS

Chrome: Click  upper right > Settings > Advanced > Privacy and Security > Content Settings > set **Popups** to "Allowed" or if you get a blocked indicator (see below), click on it and choose "Always allow pop-ups..."

Firefox: Click  upper right > Options > Permissions > uncheck **Block pop-up windows** or if you get a blocked indicator (see below), click on "Options" and "Allow pop-ups..."

Internet Explorer 11: Click  upper right > Internet options > Privacy > Uncheck **Turn on Pop-up Blocker** or if you get a blocked indicator (see below), click on "Options for this site" and "Always allow".

Safari: Click  upper left > Preferences > Security > Uncheck **Block pop-up windows**
