

Description: OnCore provides a place for study teams to record, display, and update subject deviations that might need to be reported to the IRB and/or the sponsor.

Audience: Study teams who wish to track their deviations in OnCore.

SUBJECT DEVIATIONS

A subject deviation from the approved protocol procedures is recorded in the **Deviations** tab of the **Subject Console**.

Note: **Visits Outside Tolerance** deviations are automatically created when a subject visit is occurred outside the tolerance in the study calendar.

Create a Subject Deviation

1. Navigate to **Menu > Subjects > Subject Console**.
2. [Find your Subject](#), then select the **Deviations** vertical tab.

The screenshot shows the 'Subject Console' for Protocol No. OCR16260 and Subject MRN: 34397. The subject name is Albert Gator and the status is OFF STUDY. The left sidebar has the 'Deviations' tab highlighted in red. The main content area shows 'Subject Deviations Details' with a table that currently has 'No Records Found'. Below that, 'Visits Outside Tolerance' also shows 'No Visit Deviations'. A 'New' button is highlighted in a red box in the bottom right corner of the main content area.

3. Click the **[New]** button. The *Subject Deviation Create* form opens.
4. Enter the required fields: **Date Discovered**, **Deviation Date**, and **Category**.

The screenshot shows the 'Subject Deviation Create' form. The 'Date Discovered*' field is set to 04/05/2020. The 'Deviation Date*' field is empty. The 'Category*' field is set to 'Type here to search'. The 'Reported By' field is Edythe Zettler. The 'Treating Physician' field is also set to 'Type here to search'. The 'Date Reviewed by Treating Physician' field is empty. The 'Information Source' field is empty. The 'Date Discovered*' and 'Deviation Date*' fields are highlighted with red boxes. The 'Category*' field is also highlighted with a red box.

RECORD SUBJECT DEVIATIONS

5. Enter any other appropriate details as desired.
6. Click **[Submit]** and **[Close]**.

Display and Update ALL Subject Deviations for a Protocol

1. Navigate to **Menu > Protocols > PC Console**.
2. [Find your study](#) using the **Select Protocol** search field.
3. Using the vertical menu bar, navigate to **Deviations > Subject Deviations**.
4. If you only want to see deviations that do not have an **IRB Reported Date** entered, click the checkbox next to **Show Only Unreported Deviations**.

The screenshot shows the PC Console interface for protocol OCR16260. The 'Subject Deviations' tab is selected. A table lists a deviation for subject Albert E Gator at UF Gainesville, discovered on 04/05/2020. The 'Date Discovered' column contains a blue hyperlink. At the bottom, there is an 'Update Selected IRB Reported Dates' section with an input field and an 'Update' button. A checkbox for 'Show Only Unreported Deviations' is also visible.

Study Site	Subject MRN	Subject Name	Deviation Category	Deviation Description	Date Discovered	Deviation Date	Effect on Patient Safety	Action Taken	Role Responsible for Action Taken	Has the integrity or validity of the data been compromised?	Was an IRB waiver granted?	IRB Reported Date	Select
UF Gainesville	34397	Albert E Gator	Scheduled Test		04/05/2020	4/01/2020							<input type="checkbox"/>

5. If you only need to update the **IRB Reported Date** on one or more deviations, you do not have to open each record – simply:
 - a. Click the **Select** checkbox next to each deviation that was reported to the IRB on the same date.
 - b. Enter the report date into the **Update Selected IRB Reported Dates**.
 - c. Click **[Update]**.
 - d. Repeat as needed for each report date.
6. If you need to display or update the details of an existing deviation, select the deviation [blue hyperlink](#) in the **Date Discovered** column.
7. Click **[Update]** at the bottom of the page.
8. Enter any appropriate details as desired.
9. Click **[Submit]** and **[Close]**.

Display and Update A Single Subject's Existing Deviations

1. Navigate to **Menu > Subjects > Subject Console**.
2. [Find your Subject](#), then select the **Deviations** vertical tab.
